1. The transformer is a step-down transformer with a primary voltage of 240V and a secondary voltage of 12V. The primary current is 0.42A and the secondary current is 8.3A. The transformer is rated for 100VA.

2. The bridge rectifier consists of four diodes, each rated for 1A and 100V. The diodes are connected in a bridge configuration to convert the AC voltage from the secondary winding into a DC voltage.

3. The filter capacitor is a 1000µF capacitor that smooths the output voltage of the rectifier. It is connected in parallel with the load resistor.

4. The load resistor is a 100Ω resistor that represents the load of the power supply. It is connected in parallel with the filter capacitor.
